MAGNAT MA 900 – BRINGING A SHINE TO EVERY MUSIC GENRE

„[...] The MA 900 reveals its technical properties in our listening test and it obtains maximum performance from connected speakers with an abundance of power. With a controlled bass range and highly detailed mids that are complemented by airy and wide-ranging overtones, **Magnat’s hybrid amplifier really is in the premier league of amplifiers.** But is this due to the tube preamplifier itself or the coherent overall concept of the MA 900? In any case, this Magnat amplifier brings a shine to every music genre and lends an extra special charm to singers such as Norah Jones and Cassandra Wilson. The MA 900 also scores highly in terms of its dynamic performance and provides plenty of plus points with its tight, controlled bass response. Overall, the Magnat MA 900 is extremely impressive with its enormous musicality and pleasantly warm character.”

Conclusion:

“The MA 900 from Magnat is highly recommended for discerning music lovers, as it manages to stage any genre of music in an extremely accomplished manner. Its performance is more than sufficient. What’s more, analog and digital devices, such as record players and smartphones, can be easily connected to the hybrid integrated amplifier thanks to the phono preamp and Bluetooth receiver. Magnat has combined classic tube technology with modern requirements in its MA 900 – hats off!”

- + High performance
- + Bluetooth receiver
- + Integrated phono-preamplifier

Sound: 1.0
Laboratory: 1.0
Practice: 1.1
Price/performance: VERY GOOD
TOP CLASS 1.0
